Summary

Final-year Computer Science student at BRAC University with a strong foundation in cloud computing and IT infrastructure. Proficient in Linux, Bash scripting, networking, and Python, with hands-on experience in developing a personal cloud using AWS S3 and EC2. Demonstrated web development expertise in Laravel, MERN stack, and WordPress, alongside a solid understanding of SEO tools and digital marketing strategies. Effective team leader with excellent English communication skills, currently working on UniCommute, a cloud-based solution to address Dhaka's traffic challenges. Passionate about AI advancements and cloud innovation. Eager to contribute my technical and analytical skills in a dynamic IT internship environment.

EDUCATION

BRAC University, Dhaka— B.Sc

Present

Simon Fraser University, Vancouver— B.Sc

January 2020 - January 2021

Maple Leaf International School, Dhaka— O/A Levels

July 2017 - July 2019

Experience

RU1NJURED LIMITED, IT Specialist (London, United Kingdom)

- Strategize plans for the upcoming months with the team, and come up with innovative ideas to get more conversions.
- Delivered weekly reports to the owner and maintained the website single-handedly.
- I worked with Google Console Search, SEMRush and other SEO tools to help the company generate more traffic.
- Troubleshooting any IT-related problems, and finding the solution with a small and enthusiastic team.

Website Developer, Freelancing

What did I do as a freelancer?

- Independently developed and implemented websites for various clients, focusing on enhancing online presence and customer

SKILLS

Python, MERN, PHP, Linux, AWS, Bash Scripting, TypeScript/Angular, WordPress, MySQL, MongoDB

AWARDS

1. Duke of Edinburgh - Gold Awardee
2. MLIS Community Service Club - Former President

LANGUAGES

Bangla, English, German

- engagement.
- Successfully achieved the goal of attracting more customers for a local restaurant by incorporating features for seamless table reservations.
- Designed and executed a website for an apparel buying house, strategically aimed at attracting international clients for apparel purchases.
- Demonstrated effective communication skills by engaging with clients one-on-one to understand their specific requirements and preferences.
- Showcased adaptability and versatility by managing end-to-end development processes, from client consultations to website deployment.

PROJECTS

UniCommute

Currently developing an Angular project with Google Firebase backend aimed at alleviating city traffic congestion by facilitating university students to share rides. The platform enables students from the same university to carpool, saving money and reducing the number of vehicles on the road.

Car Rental System

Developed a comprehensive Car Rental System utilizing the MERN (MongoDB, Express.js, React, Node.js) tech stack. Demonstrated proficiency in full-stack development by designing and implementing a scalable solution for managing car rental services.

Cura - Nursing at your doorsteps

Developed and implemented a nursing system named "Cura" using Laravel, showcasing expertise in backend web development. Enhanced the interaction between patients and nursing services, allowing patients to book nurses based on their specific needs.
