Junaid Abrar Razeen

An aspiring tech entrepreneur in the making

O Adelaide, SA 5000 6 +61 410 865 785 iunaid.abrar.razeen@gmail.com

Summary

My taste in music is as diverse as the logs I tail—everything from jazz to syslogs. I enjoy writing Python (the language, not the snake... although I'm open-minded) and spending time building cool stuff in the cloud. When I'm not automating something or troubleshooting like a digital detective, you'll probably find me outside soaking up real-world bugs or mosquitoes. I genuinely love working in a team because what's the point if collaboration doesn't bring out the best in us? My resume already lists the technical bits, but what it can't fully capture is my curiosity, sense of humor, and love for turning problems into clean, working solutions.

Experience

Intern

Upay (UCB Fintech Company Limited)

October 2024 - February 2025

Dhaka

https://www.upaybd.com/

- Automated campaign tracking using Python and Google Apps Script, reducing manual effort by 40% and improving cross-departmental collaboration.
- Led User Acceptance Testing (UAT) for the Agent Cash Withdrawal Module, developing test cases to resolve defects and enhance app reliability.
- Configured targeted push notifications with Firebase Cloud Messaging (FCM), leveraging data-driven segmentation to boost user re-engagement by 25%.
- Authored Business Requirement Documents (BRDs) and Software Requirement Specifications (SRS) for Upay Business Solution, enabling scalable financial services for rural communities.
- Proactively upskilled in Kubernetes, Postman API, and Google Apps Script to address complex challenges, demonstrating adaptability and technical growth.

Education

The University of Adelaide Computing and Innovation

July 2025 - Present

Master of Science

BRAC University

January 2021 - September 2024

Maple Leaf International School

July 2017 - July 2019

Computer Science

IGCSE and IAL

May 2016

Bachelor of Science

O/A Levels

Projects Envents

A cloud-integrated, multi-tenant architecture for an event management marketplace platform.

https://enventsbd.com/

Developed a full-stack event management marketplace using Django, PostgreSQL, and AWS S3, featuring venue/service booking workflows, real-time quotation systems, multi-user authentication, and admin dashboard with 75% reduction in event planning time.

Ebellia

A Jewelry E-Commerce Platform

https://www.ebellia.com/

Designed and deployed Ebellia, a jewellery e-commerce platform focused on seamless user experience and strong search engine optimisation.

UniCommute

A mobile-friendly website built for the students in Dhaka

https://www.unicommute.com

Built a scalable cloud-based carpooling platform for students using AWS Lightsail, Node.js, and React.

AWS Powered Image Analysis App

http://my-image-analysis-app-junaid.s3-website-us-east-1.amazonaws.com/

Developed a serverless web app using AWS S3, API Gateway, Lambda, and Rekognition for real-time image analysis, and implemented secure access controls with IAM.

CI/CD Pipeline With Terraform And Docker

https://github.com/JunaidAbrar/Devops-Project

Built a CI/CD pipeline to automate the deployment of a Node.js application using Terraform, Docker, and GitHub Actions.

Skills

Soft Skills

Leadership, Problem-Solving, Content Writing, Research and Analysis, Fast Learner, Communication, Teamwork, Public Speaking

Productivity

Microsoft Office, Google Workspace, PowerPoint, Excel, Sheets, Google Docs, Figma

Tech Stack

Git, Bash Scripting, Linux, SQL, Python, JavaScript, React, PHP, Virtualization

Cloud Stack

AWS, Docker, Terraform, GitHub Actions, Jenkins, Virtualization, Google Cloud

Interests

Vintage Cars, F1, Football, Technology

Awards

Gold Awardee **May 2019**

Duke of Edinburgh

President June 2018 - May 2019

MLIS Community Service Club

PASCH Summer Scholarship Goethe-Institut
