🐪 junaid-abrar-razeen

Summary

Final-year Computer Science student at BRAC University with a strong foundation in Cloud computing and IT infrastructure. Experienced in AWS, Linux, Python, and web development. Constantly expanding skills in DevOps practices and cloud technologies. Currently developing UniCommute, a cloud-based carpooling solution. Seeking a Cloud/DevOps internship to apply and enhance technical expertise in a dynamic IT environment.

Experience

RU1NJURED LIMITED　　　　　　　　　　　　　　　March 2024 - May 2024
IT Specialist　　　　　　　　　　　　　　　　　　　　　　　London, UK

- Strategize plans for the upcoming months with the team, and develop innovative ideas to get more conversions.
- Implemented SSL Encryption, validated Sitemaps, solved GDPR issues, and delivered weekly reports.
- I worked with Google Console Search and SEMRush to help the company generate more traffic and fix broken links.
- Troubleshooting any IT-related problems, and finding the solution with a small and enthusiastic team.

Freelancing　　　　　　　　　　　　　　　　　March 2023 - Present
Website Developer　　　　　　　　　　　　　　　　　　　　　Dhaka

- Attracted 20% more customers to a local restaurant by incorporating features for seamless table reservations.
- Designed and executed a website for an apparel buying house, strategically aimed at attracting international clients for apparel purchases.
- Demonstrated effective communication skills by engaging with clients one-on-one to understand their specific requirements and preferences.
- Managed end-to-end development processes, from client consultations to website deployment.

Education

BRAC University　　　　　　　　　　　January 2021 - September 2024
Computer Science　　　　　　　　　　　　　　　　Bachelor of Science
3.2/4.00

Simon Fraser University　　　　　　　　January 2020 - December 2021
Computer Science　　　　　　　　　　　　　　　　Bachelor of Science

Maple Leaf International School　　　　　　　　July 2017 - July 2019
O/A Levels　　　　　　　　　　　　　　　　　　　　IGCSE and IAL

Projects

AWS Powered Image Analysis App
🔗 http://my-image-analysis-app-junaid.s3-website-us-east-1.amazonaws.com/

Developed a web-based image analysis application using AWS services for real-time image recognition. Leveraged AWS S3 for hosting, API Gateway for RESTful endpoints, Lambda for serverless computing, and Rekognition for AI-powered image analysis. Implemented secure access controls with IAM. The application features a user-friendly interface for image uploads, providing instant analysis results including detected objects, scenes, and confidence levels.

CI/CD Pipeline With Terraform And Docker
🔗 https://github.com/JunaidAbrar/Devops-Project

A complete DevOps pipeline that automates the deployment of a Node.js application using Terraform, Docker, and GitHub Actions. The project provisions AWS EC2 infrastructure, builds and pushes Docker images to ECR, and deploys the application with continuous integration and continuous deployment.

Car Rental System
🔗 https://github.com/Ashakin23/CSE470_CarRental_System

Developed a comprehensive Car Rental System utilising the MERN (MongoDB, Express.js, React, Node.js) tech stack. Demonstrated proficiency in full-stack development by designing and implementing a scalable solution for managing car rental services.

KVM-Based Virtualization
🔗 https://github.com/JunaidAbrar/VM-Skills-Portfolio

Documented a project on creating and managing KVM-based virtual machines using both GUI and CLI on Ubuntu 22.04. The project included system updates, KVM setup, VM creation, shared folder setup with virtiofsd, connecting Android phones to VMs, and cloning VMs with additional hard disks. Demonstrated proficiency in virtualization and system administration with KVM.

Skills

Soft Skills

Leadership, Problem-Solving, Content Writing, Research and Analysis, Fast Learner, Communication, Teamwork, Public Speaking

Productivity

Microsoft Office, Google Workspace, Slack, PowerPoint, Excel, Sheets, Google Docs

Tech Stack

Git, Bash Scripting, Linux, SQL, Python, JavaScript, React, PHP, Virtualization

Cloud Stack

AWS, Docker, Terraform, GitHub Actions, Jenkins, Virtualization

---

Interests

Vintage Cars, F1, Football, Technology

Awards

Gold Awardee　　　　　　　　　　　　　　　　　　　　May 2019
Duke of Edinburgh

President　　　　　　　　　　　　　　　　June 2018 - May 2019
MLIS Community Service Club

PASCH Summer Scholarship　　　　　　　　　　　　　　May 2016
Goethe-Institut
